#### BEST AVAILABLE IMAGES

Defective images within this document are accurate representation of The original documents submitted by the applicant.

Defects in the images may include (but are not limited to):

- BLACK BORDERS
- TEXT CUT OFF AT TOP, BOTTOM OR SIDES
- FADED TEXT
- ILLEGIBLE TEXT
- SKEWED/SLANTED IMAGES
- COLORED PHOTOS.
- BLACK OR VERY BLACK AND WHITE DARK PHOTOS
- GRAY SCALE DOCUMENTS

#### IMAGES ARE BEST AVAILABLE COPY.

As rescanning documents will not correct images, please do not report the images to the Image Problem Mailbox.

```

Pred. No. is the number of results predicted by chance to have

score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

                                                                                                                                           sequence clones from Drosophila Gene Collection I (Rubin et al., Science 2000). The sequence has been subjected to integrity checks for sequence accuracy, presence of a polyA tail and contiguity within 100 kb in the genome. Thus we believe the sequence to reflect accurately this particular cDNA clone. However, there are artifacts associated with the generation of cDNA clones that may have not been detected in our initial analyses such as internal priming, priming from contaminating genomic DNA, retained introns due to reverse transcription of unspliced precursor RNAs, and

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        source
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             This clone was sequenced as part of a high-throughput process to sequence clones from Drosophila Gene Collection 1 (Rubin et al., Sclence 2000). The sequence has been subjected to integrity checks for sequence accuracy, presence of a polyA tail and contiguity within 100 kb in the genome. Thus we believe the sequence to reflect accurately this particular cDNA clone. However, there are artifacts associated with the generation of cDNA clones that may have not been detected in our initial analyses such as internal priming, priming from contaminating genomic DNA, retained introns due to reverse transcription of unspliced precursor RNAs, and reverse transcriptase errors that result in single base changes. For further information about this sequence, including its location and relationship to other sequences, please visit our Mpb site (http://fruitfly.berkeley.edu) or send email to
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      AY121675

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Searched:
Pred. No. 1s the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      IDENTITY_NUC

                                                             DNA molecule Lc743 (AAT68596) codes for an esterase (AAW17765) fr a malathion susceptible strain of Lucilia cuprina. Comparison with a consensus sequence from derived from clones of the Lc-alpha-E7 resistant allele (see also AAW17768) indicated only creplacement site difference, a Trp to Leu substitution at amino acid position 251 (nucleotide position 752). This mutation is an excellent candidate for the malathion resistance mutation. The resistant enzyme acts as a malathion carboxylesterase and can be formulated for use in degrading environmental carboxylester, or dimethyl general organophosphates.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            SS.

                                                                                                                                                                                                                                                                                                                 RT-PCR was used to clone a cDNA allele of Lc-alpha-E7 (end op-susceptible esterase E3 of L. cuprina) from a diazinon resistant strain, Llandillo 103. 4 Isolated clones were sequenced (Lc7L103 A-D, AAQ91562-65) that encoded diazinic esterases. The esterases, or cells expressing them, are used to the contest of the sterases.

                 RT-PCR was used to clone a cDNA allele of Lc-alpha-E7 (encoding OP-susceptible esterase E3 of L. cuprina) from a diazinon resistant strain, Llandillo 103. 4 Isolated clones were sequenced (Lc7L103 A-D, AAQ91562-65) that encoded diazinin-resistant esterases. The esterases, or cells expressing them, are used in bioremediation.

The esterases, or cells expressing them, are u in bioremediation.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        В
A 1710 bp DNA molecule (AAT68597) comprises the Md-alpha-E7 coding sequence of the Musca domestica Rutgers strain. It was isolated by amplification of genomic DNA using alpha-esterase consensus primers (see also AAT68598-99) and use of a 534 bp amplicon to screen a genomic library of M. domestica. A mutation of the gene, resulting in substn. of serine for tryptophan at amino acid position 251 (see also AAW17767), confers malathion
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  1501
